Preface

“Los Santos. The city of shitheads. Where else would he be?”

— Trevor Philips

Chapter 1

Introduction

This publication focuses on artistic practices within the game Grand Theft Auto V. The goal of this is to create a resource to explore the ways in which the game has been used by different artists in the field of digital visual art and game art. The Artist's Guide to Los Santos is partly a curatorial project to present important works of in-game photography and machinima, partly a virtual tourist guidebook through the game spaces that were explored and used by artists in their creation, and partly an educational resource for anyone interested in learning how to engage artistically with the game.

1.1 Los Santos

Just like Los Angeles – the city it is modelled upon – is the global centre of film and commercial media production, Los Santos is the epicentre of in-game photography and machinima creation.

1.2 Game art tourism

This guide allows players to explore the game environment following some of the artworks that have been created in it. Mixing a playful tourist guide approach with curatorial writings about the works, the publication is an invitation to rethink the game object as a space for creative, subversive and critical endeavours, as well as to showcase seminal artworks that have had a profound impact on contemporary visual culture.

1.3 Game art education

Finally, The Artist's Guide to Los Santos provides practical tools in the form of a technical manual. While many scattered resources already exist online, the publication aims at bringing together a series of tutorials that can be easily followed and that start from an artistic perspective. From photographic and cinematic tips, to step by step modding lessons, the guide covers the basic knowledge to capture and modify the world of GTA V. The lessons are also accompanied by re-enactment missions, where the reader is tasked to recreate some of the artworks mentioned in the guide.
